

<b>Faculty In Charge Of Course:</b>	Kiwon Lee, MD
<b>Participating Faculty:</b>	Kiwon Lee, MD, H. Alex Choi, MD, Tiffany Chang, MD, George Williams, MD, Wanda Ahmed, MD, Jeremy Ragland, MD, Robert Brown, MD
<b>Location:</b>	Memorial Hermann Hospital
<b>Offered:</b>	Monthly
<b>Max. # Students/Period:</b>	2

### Course Objective

To achieve a baseline competency in the care of the critically ill patient. In particular, the student will learn how to manage multi-system failure in patients suffering from devastating neurological events.

### Material Covered:

- 1) Evaluation of critically ill patients including history and physical examination, appropriate use of laboratory and ancillary diagnostic tests, interpretation of routine imaging used in the ICU including x-rays, CT scans and MRI
- 2) Basic neurologic exam as well as learning to evaluate patients with critical neurologic illness; the student will see the entire gamut of neurointensive care including head and spinal trauma, intracranial bleeds, strokes, etc.
- 3) Pharmacotherapy for all aspects of critical illness.
- 4) Critical care interventions ranging from state-of-the-art ventilatory techniques through management of intracranial hypertension.
- 5) All commonly performed intensive care procedures including, but not limited to: endotracheal intubation, bronchoscopy, insertion of central venous and arterial catheters, etc.

### Skills Acquired:

Students are assigned to the critical care team in the Neurotrauma Intensive Care Unit (NTICU). Routine skills acquired include advanced history and physical evaluation of critically ill patients as well as cognitive and procedural skills for the management of NTICU patients. In addition, the student will have the option of spending time in the operating room, observing neurosurgical procedures.

### Activities Of Elective

**Number Of New Patients/Student/Week:** Varies

### Responsibilities Of Student For Assigned Patients:

Does history/physical:	Yes
Who critiques:	Attending
Follows patients, with appropriate notes as needed:	Yes
Who supervises:	Attending
Does student see ambulatory patients:	No

Procedures	Observe	Perform
Students observe or assist in the gamut of procedures involved in critical care including intubations, line placements, PA catheters, etc.	X	Assist

### Scheduled Duties of Student:

Frequency of rounds on patients	Daily
Presents patients to preceptor or attending physician	Yes
Weekly schedule of required teaching sessions	Daily faculty rounds and didactic teaching sessions

### Describe Optional Rounds And Activities, If Any:

Writing or presenting a paper	Optional
-------------------------------	----------

### How Is Student Evaluated:

The student's evaluation will be based on interest and participation during rounds and cognitive and procedural performance in relationship to patient care in the NTICU

**Who Evaluates Students:**

Attending

**Unique Features Of This Elective:**

Student learns from being “on-the-job.” Each student is assigned patients to follow while in the ICU and may also elect to observe the related surgical procedures.
