Course Objective

Material Covered:
The objectives of the elective are dependent upon the specifically approved research project. Time commitment for the elective will involve at least 30 hours per week with at least 10 structured hours (clinical, conference, lecture).

Skills Acquired:
Investigational methods in the clinical and/or laboratory setting as well as writing, editing, and submitting articles for publication.

Activities Of Elective

The elective involves significant teaching by faculty with at least five (5) hours per week aimed at the MSIV level.

Scheduled Duties Of Student:
Specific duties will depend largely on the assigned project and will be provided to the student in writing at the beginning of the elective period.

Describe Optional Rounds And Activities, If Any:
Dermatology teaching conferences, grand rounds; consult service.

Other Required Activities:

<table>
<thead>
<tr>
<th>Reading/review of current literature:</th>
<th>Yes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Writing or presenting a paper:</td>
<td>Yes, both write and present a paper.</td>
</tr>
</tbody>
</table>

How Is Student Evaluated:

Students are observed and evaluated based on the demonstration and quality of their accomplishment of the objectives and any required publication through close interaction with the faculty. Mid-rotation feedback is encouraged for all students, but written feedback is required for any student identified as having deficiencies as soon as the deficiency is identified.

Who Evaluates Student:
Assigned faculty.
