Course Objective

Material Covered:

This third-year elective is intended to introduce students to the field of anesthesiology. Students will learn the principles of airway classification and management as well as the basic pharmacology related to anesthesiology. Students will have the opportunity to see the clinical application of multiple organ physiology. Students will be introduced to learning how to conduct a preoperative evaluation of patients. A basic anesthesiology textbook will be on loan to each student during their rotation.

Specific learning objectives for this third-year elective are as follows:

By the end of this elective, the student will be able to:

- Describe the principles of airway classification and management
- Discuss the basic pharmacology related to anesthesiology
- Apply basic physiology to the clinical setting
- Perform a preoperative evaluation of patients

Students will attend weekly didactic conferences (Thursday AM) and will participate in clinical duties Monday through Friday (6:30 am – 3:00 pm). Students will not take call.

Students will demonstrate attainment of the above objectives through attendance and participation in didactic conferences and attendance at clinical assignments and participation in clinical activities.
