

The BRAINS Research Laboratory is a multifaceted group with many interests and projects that stem from the core focus of stroke, aging, inflammation, recovery, neurodegeneration, and sex-differences. The lab has multiple principal investigators, who offer their knowledge and expertise to post-doctoral fellows and graduate students. There is a strong environment of independence in the lab, which in part, allows for almost every individual to work on their own project or segment of a larger project. In conjunction with independent labs, the BRAINS Research Laboratory collaborates and works as a team; each individual possesses a unique skill set that they want to share with others both within the group and throughout UTHealth here in Houston. The BRAINS Research Laboratory serves as a home for over 42 investigators, research scientists, research fellows and assistants, graduate, medical and undergraduate students.

IMPORTANT INFORMATION AND DEADLINES

Eligibility for the BRAINS Summer Research Program- Must be a student in high school or an undergraduate program.

Submission Deadline- Application and supplemental materials are due **March 3, 2023.**

Compensation- Pay range depends on year seniority in the program and research experience.
