### SCREEN and TEST

- All pre-operative patients need COVID-19 test
  - Emergent test for all NICU patients
  - Cannot isolate NICU patients
- COVID-19 test ordered by NICU physician
  - Do not wait for transport to OR if emergent or bedside
- For non-emergent cases, surgery will wait for Emergent test results.
- If a negative COVID-19 test is obtained, test will be considered valid for 72 hours.
- Must retest if another procedure is required outside that 72 hour window

### DISPOSITION

- All tested patients are considered COVID-19 (+)/PUI patients until negative
- For COVID-19 (+)/PUI, Droplet+ sign placed at bedside/door
- All patients regardless of size will be placed in isolate
- Infants transported in an isolette
- Patient tracker updated with status-labeled suspect or COVID-19 (+)
- Critically ill patients/isolation
  - Duck and lion pods will be utilized
- All patients will be placed in isolate if size permits

### TRANSPORT and RESOURCES

**TRANSPORT**

- For COVID-19 (+)/PUI, NICU transport team will transport to location: OR, imaging
- NICU transport with pediatric anesthesiologist or fellow will transport OR to NICU

**RESOURCES**
