DO YOU HAVE A SIBLING WITH BIPOLAR DISORDER?

The **UT Center of Excellence on Mood Disorders** is conducting a brain imaging study for siblings ages 18-65 years old, which includes:

- Siblings of the same gender
- Within 10 years of age
- One sibling has bipolar and one does not

Call us today for more information **713-486-2627**.

The risks and benefits of participation will be discussed with you.
OTHER STUDIES AT UTCEMD

Children With Bipolar Disorder
We are currently seeking children, ages 6-17, with bipolar disorder or who are offspring of bipolar parents for evaluation and diagnosis to create a registry in order to provide more information on treatment.

Adults With Bipolar Disorder
We are currently seeking patients, ages 18-65, with Bipolar Disorder who are experiencing a depressive mood and taking medication for an adjunctive therapy trial.
