School's almost out!

Summer break is almost here, but the UT Center of Excellence on Mood Disorders will still be in full swing recruiting children for our Pediatric Bipolar Registry! Is your child having mood swings? We provide evaluation at no cost for children with mood swings who may have bipolar disorder OR for children whose parent has bipolar disorder.

Continue reading below for more information.

Does your child have MOOD SWINGS?

The UTCEMD is currently recruiting children, ages 6-17, for a Pediatric Bipolar Registry.

Your child may qualify if:

- Between the ages of 6 and 17
- Experiencing mood swings or depression
  - OR
• A child whose parent has bipolar disorder

Call us today for more information 713-486-2627.
The risks and benefits of participation will be discussed with you.

OTHER STUDIES AT UTCEMD

Adults With Bipolar Disorder
We are currently seeking adults, ages 18-65, with Bipolar Disorder who are currently experiencing a depressive mood and taking medication. The study is an adjunctive therapy trial with N-Acetyl Cysteine and Aspirin.

Siblings With Bipolar Disorder
We are currently recruiting siblings, ages 18-65, for a new brain imaging study for sibling pairs where one of the siblings suffers from bipolar disorder and one does not. We are also recruiting healthy controls for this study.
