Do YOU or a LOVED ONE suffer from BIPOLAR DISORDER?

Common Symptoms of Bipolar Disorder
- Periods of elated or irritable mood with:
  - Less need for sleep
  - Increased energy and activity
  - Excessive talking
  - Racing thoughts
  - Impulsive behavior

UTCEMD is currently enrolling children, adolescents, and adults with Bipolar Disorder for research studies. If you have been diagnosed or believe you may be experiencing some of the symptoms listed above, give us a call to learn more about our studies.

713-486-2627
The risks and benefits of study participation will be discussed with you.

RESEARCH STUDIES

Adult Bipolar Siblings
Recruiting same gender siblings within 10 years of age where one sibling has Bipolar and one does not.

Adult Bipolar Depression
Recruiting patients with Bipolar who are taking medications and currently depressed.

Children with Bipolar
Recruiting children and adolescents ages 6-17 with mood swings and Bipolar Disorder.

Bipolar Offspring
Recruiting children and adolescents ages 6-17 whose parent has Bipolar Disorder.

Adult Bipolar
Recruiting adults ages 18-65 who have Bipolar Disorder and are in any mood state.
