DII Updates - Coronavirus

March 30, 2020
COVID 19 update

Updates from UTHealth and the hospitals:

- Hospitals currently have adequate ICU capacity and PPE. MHH-TMC is currently working on a surge plan that will be ready if a surge is imminent.
- More rapid COVID 19 testing is becoming available, with current ability to get a 1-2 day turnaround for high suspicion cases.
- Timeline for restarting elective and non-urgent procedures is still unknown.
- ED volumes are down 20-33% overall; patients with COVID 19 symptoms continue to increase.

Surge plans will include propositions for redeploying physician volunteers to areas outside of their usual specialty, but there are no expectations at this point that physicians will be required to do so.
