DII Updates - Coronavirus

April 15, 2020

COVID 19 update

- As most of us are working remotely, it is important to be mindful of our actions so that the VPN servers are not unnecessarily overloaded. Please review Petra's email regarding tips on working from home.
- This also an important time to catch up certain administrative tasks such as the 2020 Provider Mandatory Education which is due **April 30th**. See attached instructions.
- The attached Radiographics article is a good review of infection control practices for radiologists. A few things have changed, but overall it is useful information.

Since this situation is actively evolving, we are urging all individuals to actively view the following links to stay informed:
