DII Updates - Coronavirus

April 16, 2020

COVID 19 update

As we anticipate the upcoming surge at the end of this month, MHH is actively monitoring several models that predict the extent of the COVID-19 pandemic to make a decision on when they will resume non-urgent elective surgeries and procedures.

Because of the continuation of increasing COVID19 cases with an expected peak on or around April 28, we will continue residents rotating in house in reduced numbers for the next set of rotations in May. Once they begin to reduce restrictions on outpatient elective imaging, we will reconsider when to transition them back to more normal working schedules.

Since this situation is actively evolving, we are urging all individuals to actively view the following links to stay informed:
