**Weekly Digest of COVID-19 Guidelines**

**CDC**
- (4/6) Updated [When You’ve Been Fully Vaccinated](#), including:
  - Travel domestically without a pre- or post-travel test
  - Travel domestically without quarantining after travel
  - Travel internationally without a pre-travel test depending on destination
  - Travel internationally without quarantining after travel
- (4/6) [Variant cases in the US](#) continue to climb
  - B.1.1.7 -- 16,275 cases in 52 jurisdictions
  - B.1.351 -- 386 cases in 36 jurisdictions
  - P.1 -- 356 cases in 25 jurisdictions
- (4/7) [Overall US COVID-19 Vaccine Distribution and Administration Update as of Wed, 07 Apr 2021](#)
  - 110M half-vaccinated, 64.4M fully vaccinated
- (4/6) Updated [V-safe Pregnancy Registry](#)
  - If you are pregnant, you may choose to be vaccinated when it’s available to you. Based on how these vaccines work in the body, experts believe they are unlikely to pose a specific risk for people who are pregnant. However, data are limited about the safety of COVID-19 vaccines for people who are pregnant. CDC established the v-safe COVID-19 Vaccine Pregnancy Registry to learn more about this issue. The information is critical to helping individuals and their healthcare providers make informed decisions about COVID-19 vaccination.

**IDSA**
- (4/5) Version 4.1.2 of the IDSA Guidelines on Treatment and Management of COVID-19 patients has been released and contains a revision to the number of studies included in [Table 9](#) in the section on remdesivir.
